

Ankita Waghmare Full Stack Software Engineer

✉ ankitakwaghmare@gmail.com ☎ 9529737900 📍 Pune, Maharashtra 🌐 [linkedin.com/in/ankita-waghmare/](https://www.linkedin.com/in/ankita-waghmare/)

👤 PROFILE

Full Stack Software Engineer with 3+ years of experience in Angular, React, Node.js, Express.js, and RESTful API development. Proven ability to build scalable frontend interfaces and backend services, with strong expertise in MySQL, PostgreSQL, MongoDB, and SQLite. Experienced in leading development teams and owning full SDLC including API design, database modeling, authentication/authorisation, CI/CD, and production deployments. Skilled in Git, Bitbucket, Docker, Linux, and modern DevOps practices. Strong background in application performance optimisation, debugging, monitoring, and writing unit-tested, maintainable code. Collaborative team player experienced in code reviews, developer mentoring, and working closely with product, QA, and DevOps teams to deliver high-quality, reliable software systems.

🧠 SKILLS

Angular | NodeJS | React JS | ExpressJS | TypeScript | XtermJs | HTML | CSS | JavaScript |
React Native | Bootstrap | SQLite | MySQL | MongoDB | Postgres | Sqliite | Git | BitBucket | JIRA |
Confluence | Figma | IoT | Postman | WordPress | Unit Testing | Raspberry Pi | Nocobase |
Web Assembly | Database Management | CICD | Genkit | Linux | RESTful APIs | Problem Solving |
Leadership | Lovable AI | AI Tools | HTTP, MQTT, TCP/IP, TLS, SSH

📁 PROFESSIONAL EXPERIENCE

Full Stack Software Engineer, Innotronix Labs and Trading Sep 2023 – present | Pune, Maharashtra

- Created scalable enterprise dashboards, device monitoring systems, and automation tools for retail and industrial sectors.
- Built full-stack modules using Angular, React, Node.js, TypeScript, and PostgreSQL/SQLite, improving data accuracy and reducing resolution time.
- Implemented secure RBAC, authentication workflows, and optimised REST APIs for reliability and high availability.
- Worked with Raspberry Pi and Ethernet-based device control scripts to improve communication reliability.
- Collaborated with cross-functional teams and led delivery workflows to increase development efficiency.

Software Developer, UpperThrust Technologies Pvt Ltd Dec 2022 – Sep 2023 | Pune, Maharashtra

- Built full-stack applications with Node.js, Angular, and PostgreSQL for enterprise clients.
- Improved UI performance, enhanced API efficiency, and built reusable frontend components.
- Delivered secure authentication modules and user management workflows with role-based permissions

Junior Associate Technology, Publicis Sapient Pvt Ltd Jul 2022 – Dec 2022 | India

- Completed full-stack engineering training and contributed to UI components, backend APIs, bug fixes, and sprint deliverables for production applications.

📁 PROJECTS

1. Key Management System

- Implementing a secure embedded key and activity management platform featuring MFA (RFID, fingerprint, PIN), TCP/IP-based event logging, and resilient firmware capable of handling high-volume daily transactions.

2. SLA Performance Monitoring Portal - Reliance - 7 Day Hackathon Project, Project Lead

- Delivered a platform for multi-vendor SLA oversight with ticket handling, compliance analytics, device uptime tracking, and secure RBAC-based access.

3. Papis Project, for Indian Railways

- Developed BMU/MPU modules for GPS-driven data processing and system control; integrated LCD displays and automated PA announcements for real-time onboard updates.

4. Warranty Registration Portal, Project Lead

- Created a full-stack solution for digital warranty management and supply tracking with JWT-secured authentication, structured APIs, and automated CI/CD for scalable rollout.

5. Enterprise Dashboard

- Designed a unified dashboard for nationwide RO monitoring with device health insights, remote management controls, and OTA deployment support.

6. System Management Web Dashboard

- Enhanced the JIO-BP operational dashboard; built backend services using Node.js and SQLite and developed Ethernet communication scripts on Raspberry Pi with static IP and RTC configuration.

7. Serial Integration with Xibo Player

- Deployed Xibo using Docker and integrated serial communication features; handled display layouts, content scheduling, and media workflows.

8. MBOCWW, Maharashtra Building And Other Construction Workers' Welfare Board

- Engineered modules for large-scale data operations with reusable UI components, secure user access, and configurable administrative controls.

9. NinjaNet

- Implemented Node.js APIs for CRUD operations, reusable components, and user login with authorization safeguards.

 EDUCATION

Bachelors of Engineering, Pune Institute of Computer Technology	2019 – 2022 Pune, Maharashtra
Diploma, Government Polytechnic College	2016 – 2019 Latur, Maharashtra
